NOTE TO WESTINGHOUSE CASE FILES

I received a call this morning from Ron Tschiegg, Westinghouse, inquiring as to the status of Cheswick safeguards submittal. I told him that we had ~~completed~~ ^{completed} our review and that we should be able to send him a letter on the submittal by the end of the week or early next week. He stated that he expected to send us the safeguards application for the new plutonium facility at Cheswick shortly after the first of the year.

The submittal for the new plant in South Carolina should be in our hands sometime in February. He stated that the Columbia plant will probably not become operational until next fall, and that the safeguards application is further advanced than the health and safety application.

He added that he would like to receive the comments on the Cheswick safeguards application before he sends us the submittal on the Columbia facility.
