**Subject:** Lambda Res

A meeting is set up for Monday (10/18 ) morning at 10:00am in room O-9A18.

The purpose of this meeting is to discuss the technical content of allegation 99-A-57. In particular there are two topics we need to decide on prior to our board meeting on October 20, 1999:

1. What is the Safety Significance & Basis of the information provided to us by the allegor? What is the link between bad data (pole figure peak position) and the nuclear industry licensing basis (like Seismic Events)
2. We recommended to the board that the allegation be referred to GE Nuclear, because they have the expertise to evaluate the analysis in questions. How do we do this without fingerprinting the allegor?

Thanks, Joe
