I. Rerun NUREG-1465 (cond. 2id) S.T.

but this time with inks later DCF's for

Ru-106 set to 0.

- Start with DOSDATA.INP.
- Zero out the ink later DCF's for Ru-106.
- Rename it DOSDATA.INP

• Start with early 10.inp (have evacuation).

• Change it to call DOSDATA.INP

• Rename it early 10.inp. ←

This is dated 11/14/00 and is different from another "early 10.inp" file on my PC.
