

May 29, 2001

MEMORANDUM TO: File

FROM: Leonard N. Olshan, Project Manager, Section 1  
Project Directorate II */RA/*  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

SUBJECT: CLOSEOUT OF EPRI TAC NOS. M77890 AND M96508

In the attached e-mail, Gary Vine of the Electric Power Research Institute (EPRI) provided the status of TAC Nos. M77890 and M96508. TAC No. M77890 entitled "Passive RD SER for Chapter: Overall Requirements," is considered by EPRI to be complete. TAC No. M96508 entitled "Qualification Program for Programmable Logic Controllers," is still open for three vendors and is being tracked by separate TAC Nos.: (1) Westinghouse Common Q, (2) Framatome (Siemens) Teleperm XS, and (3) Triconex Tricon.

Therefore, since TAC No. M77890 is considered complete by EPRI and TAC No. M96508 is being tracked by other TAC Nos., both of these TAC numbers are considered closed by this memorandum.

Project No. 669

Attachment: E-mail from EPRI dated 5/6/01

**To:** "OLSHAN, LENNY (NRC)" <lno@nrc.gov>  
**Date:** 5/6/01 7:52AM  
**Subject:** RE: CLOSE OUT OF EPRI REVIEWS

Lenny -- here are your answers:

For the Passive Utility Requirements. Document:  
The URD is complete. We didn't asked for NRC review past rev 4 [leading to NRC-initiated changes through rev 6], and we have no current plans for changes beyond those processed through '98.

For the Qualification Program for Progamable Logic Controllers  
The reviews for the PLC work are still open.

1. For Westinghouse (ABB/CE) Common Q, additional qualification work is being done and will be submitted to NRC. The SER on the first submittal was received last year.
2. For Framatome (Siemens) Teleperm XS, some additional qualification work is being done and probably will be submitted to NRC. The SER on the first submittal was received last year.
3. For Triconex Tricon, NRC is in the process of reviewing the topical.
4. Two other companies have contacted EPRI about possibly working with us to develop a submittal on their products. We do not know at this time if this will happen or not.

Thanks, Gary
