Subject: Response to Regulatory Issue Summary 2001-08,
"Operating Reactor Licensing Action Estimates"

Consolidated Edison Company of New York, Inc. ("Con Edison") currently estimates that approximately nine licensing actions will be submitted to the NRC during the remainder of the 2001 NRC fiscal year and approximately twelve will be submitted during the 2002 NRC fiscal year. This would include approximately fourteen License Amendment Requests and six ASME code relief requests. Submittal of Improved Standard Technical Specifications (ITS) for Indian Point 2 is the single complex licensing action. The submittal of ITS is planned for the last quarter of 2001. In addition, in NRC fiscal year 2002, it is intended the NRC be notified of the plant's intent to store spent fuel in Dry Cask Storage under the general licensing provisions of 10CFR72. Attachment 1 lists the licensing action requests by NRC fiscal year.

No new regulatory commitments are being made by Con Edison in this correspondence.

Should you or your staff have any concerns regarding this matter, please contact Mr. John McCann, Manager, Nuclear Safety & Licensing at 914-734-5074.

Sincerely,

Attachment

A 001

Summary of Licensing Actions by NRC Fiscal Year

Consolidated Edison Company of New York, Inc.
Indian Point Unit Nos. 1 and 2
Docket No. 50-003 and 50-247

PROJECTED OPERATING REACTOR LICENSING ACTIONS

NRC FISCAL YEAR 2001

- 1) Submit a License Amendment Request to convert to Improved Standard Technical Specifications for Indian Point 2.
- 2) Submit a License Amendment Request to revise reactor coolant system heatup and cooldown curves along with revisions to the over pressurization system and hydrotest requirements.
- 3) Submit a License Amendment Request for a five-year extension to the Integrated Leak Rate Test testing frequency.
- 4) Submit a License Amendment Request to remove the containment isolation valve lists from the Technical Specifications.
- 5) Submit a License Amendment Request to eliminate the Post Accident Sampling System as a required system.
- 6) Submit a License Amendment Request to credit boron in the spent fuel pool.
- 7) Submit a License Amendment Request to delete high radiation controls from the Indian Point Unit No. 1 and No. 2 Technical Specifications and control high radiation areas in accordance with Regulatory Guide 8.38.
- 8) Submit a License Amendment Request for a one time Technical Specification change to permit Residual Heat Removal pump work while on-line.
- 9) Submit one ASME code relief request for Indian Point 2. This is based on historical needs.

NRC FISCAL YEAR 2002

- 1) Notify NRC of the intent to store spent fuel under the general licensing provisions of 10CFR72.
- 2) Submit a License Amendment Request to incorporate the recommendations of NEI 97-06 for steam generator operating and testing requirements.
- 3) Submit a License Amendment Request to revise the Indian Point 1 Technical Specifications, as required, to correct references to Indian Point 2 Technical Specifications so as not to conflict with the Improved Technical Specifications for Unit No. 2.
- 4) Submit a License Amendment Request for surveillance test extensions.
- 5) Submit a License Amendment Request to remove the cycle specific constraint on Rod Position Indication deviation allowances and online calibration of Rod Position Indicators.
- 6) Submit two other License Amendment Requests and approximately 5 code relief requests during this period. This is based on historical needs.
