Subject: NIX MOX

Tim Harris,

I urge the NRC to stop further development and implementation of the MOX program. The list of problems is too long to go into here. This is a risky experiment, run at the public's expense. The fact that the entire nuclear industry has to be protected from it's insurance liability by tax payer dollars in the form of the Price Anderson Act, is an indication of how absurd this idea is. Please support the "No Action Alternative" and send this plan back to the DOE for further consideration.

Sincerely,

Crispin B. Hollinshead
