U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Mail Station P1-37
Washington, DC 20555

Dear Sirs:

**Subject: Palo Verde Nuclear Generating Station (PVNGS)
Units 1, 2, and 3
Docket Nos. STN 50-528/529/530 and 72-44
Request to be Added to Document Distribution for Docket
No. 72-1015**

As communicated in previous correspondence and in meetings with the NRC, Arizona Public Service (APS) plans to utilize the NAC UMS dry cask spent fuel storage system in a 10 CFR Part 72 general license independent spent fuel storage installation (ISFSI) at PVNGS. The NAC UMS dry cask storage system has been issued Certificate of Compliance (CoC) no. 72-1015 by the NRC. As a future user of the NAC UMS dry cask storage system, APS believes it is necessary to stay informed of regulatory activities involved with this cask system, such as NRC inspections, CoC amendment activity, NRC requests for additional information, etc. Therefore, APS requests to be added to the distribution of NRC letters regarding the NAC UMS dry cask system, docket number 72-1015. The individual to be added to distribution is:

Mr. Scott A. Bauer
Department Leader, Regulatory Affairs, MS 7636
Arizona Public Service Company
P. O. Box 52034
Phoenix, AZ 85072-2034

This letter does not make any commitments to the NRC.

If you have any questions, please contact Scott A. Bauer at (623) 393-5978.

Sincerely,

SAB/GAM/kg
