Mr. William A. Eaton  
Vice President, Operations GGNS  
Entergy Operations, Inc.  
P. O. Box 756  
Port Gibson, MS 39150

SUBJECT: GRAND GULF NUCLEAR STATION, UNIT 1 - REQUEST FOR ADDITIONAL  
INFORMATION RE: REQUEST FOR EXEMPTION TO SECTION 50.71(e)(1)  
OF TITLE 10 OF THE *CODE OF FEDERAL REGULATIONS* (10 CFR)  
UPDATED FINAL SAFETY ANALYSIS REPORT (UFSAR) UPDATE  
REQUIREMENTS (TAC NO. MB1455)

Dear Mr. Eaton:

The staff is reviewing your exemption request dated November 28, 2000 (GNRO-2000/00086), for discontinuing the submission of the Grand Gulf Nuclear Station (GGNS) UFSAR in accordance with 10 CFR 50.71(e)(1) requirements. Instead of those requirements, GGNS has proposed that the UFSAR will be available on the World Wide Web at a publically accessible Internet website to be operated and maintained by Entergy Operations, Inc. Based on this review, the enclosed request for additional information (RAI) has been developed.

It is requested that you provide a response to the enclosed RAI within 60 days of receipt of this letter. This response schedule was discussed with Mr. Lonnie Daughtery of your staff on April 2, 2001, who indicated that GGNS will be able to meet this schedule. The staff appreciates the efforts expended with respect to this matter.

If you have any questions regarding this issue, please call me at 301-415-2623.

Sincerely,

*/RA/*

S. Patrick Sekerak, Project Manager, Section 1  
Project Directorate IV & Decommissioning  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

REQUEST FOR ADDITIONAL INFORMATION

REQUEST FOR EXEMPTION TO 10 CFR 50.71(e)(1)

UPDATED FINAL SAFETY ANALYSIS REPORT (UFSAR) UPDATE REQUIREMENTS

(REF. GNRO-2000/00086, DATED NOVEMBER 28, 2000)

1. The licensee should address plans for distribution of back-up Compact Disk Read-only Memories (CD-ROMs) to the U. S. Nuclear Regulatory Commission (NRC) staff. Should the UFSAR website fail during a plant incident, what provisions can be made for rapid distribution of the back-up CD-ROMs to the NRC and plant staffs?
2. How will the UFSAR website be protected from attempted and successful unauthorized entry? Can such attempted and successful unauthorized entries be reliably detected? What remedial action would be taken, and how soon, should a successful unauthorized entry be detected? Please address normal and exigent circumstances.
3. The licensee should propose reporting requirements concerning unauthorized entry (e.g., report within 30 days in the event of a successful unauthorized entry, and annually on all attempted and successful unauthorized entries). Alternately, the licensee may commit to using their corrective action program to resolve problems associated with attempted and successful unauthorized entry.
4. How can changes to the UFSAR be observed (e.g., change pages)?
5. Are there any meaningful statistics, thus far, concerning the UFSAR website availability? What is the licensee's expectation, when the website is mature, concerning availability?
