Garry L. Randolph, Senior Vice  
President and Chief Nuclear Officer  
Union Electric Company  
P.O. Box 620  
Fulton, Missouri 65251

SUBJECT: ANNUAL ASSESSMENT LETTER - CALLAWAY PLANT (REPORT 50-483/01-01)

Dear Mr. Randolph:

On May 7, 2001, the NRC staff completed its end-of-cycle plant performance assessment of Callaway Plant. The end-of-cycle review for Callaway Plant involved the participation of all technical divisions in evaluating performance indicators (PIs) for the most recent quarter and inspection results for the period April 2, 2000, to March 31, 2001. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility so that you will have an opportunity to prepare for these inspections and to inform us of any planned inspections which may conflict with your plant activities.

Overall, Callaway Plant operated in manner that preserved public health and safety and met all cornerstone objectives with minimal reduction in safety margin. Plant performance for the most recent quarter was within the degraded cornerstone column of the NRC's Action matrix based on three white findings identified in September 2000. These findings were associated with poor planning and controls to keep radiation worker doses as low as is reasonably achievable (ALARA) during the 1999 refueling outage. During a supplemental inspection conducted in April 2001, our inspectors determined that your staff performed a thorough evaluation of the causes of job doses that were not ALARA and identified appropriate corrective actions. Our review of the 2001 refueling outage has not identified similar ALARA problems. We plan to conduct a Regulatory Performance Meeting to discuss the corrective actions associated with these findings. The schedule and agenda for this meeting will be transmitted by separate correspondence.

Additionally, on May 14, 2001, the staff issued a Severity Level III Notice of Violation and Proposed Imposition of a \$55,000 Civil Penalty in accordance with the enforcement policy. Contrary to 10 CFR 50.7, Union Electric and one of its contract organizations discriminated against a security officer and a training instructor for having engaged in protected activity. NRC followup activities will be determined following review of your response to the Notice of Violation.

The enclosure details the scheduled inspections that will occur through May 31, 2002. The inspection plan is provided to minimize the resource impact on your staff and to allow for

scheduling conflicts and personnel availability to be resolved in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature.

For your information, the NRC is in the process of aligning the inspection and assessment cycle with the calendar year. In order to transition to a calendar year cycle (January 1 through December 31), the next inspection and assessment cycle will consist of only three quarters (i.e., the second, third, and fourth calendar quarters of CY 2001). As a result, a quarterly review will be conducted for the third calendar quarter (July 1 through September 30) in lieu of a midcycle review. The impact on the inspection plan, which is included as an enclosure, is minimal. Activities planned for the transition cycle represent only 60-80 percent of those activities that would be accomplished during a typical 12-month inspection and assessment cycle.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

If circumstances arise which cause us to change this inspection plan, we will contact you to discuss the change as soon as possible. Please contact Bill Johnson at (817) 860-8148 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

Ellis W. Merschoff  
Regional Administrator
