Attn: Carol Anne Reed

RE: Official Request for Information Based on the Freedom of Information Act

Dear Ms. Reed:

EA Engineering, Science and Technology, Inc. (EA) is under contract to **Gettysburg College**, Gettysburg, Pennsylvania to investigate the status of two radiation laboratories that are located on campus. The laboratories are located in McCreary Hall Rooms 202 and 104/108 as governed by U.S. Nuclear Regulatory Commission license **SNM-245**, which was granted on 4 October 1993. Based upon documentation provided to EA by Dr. Steven W. James, Radiation Safety Officer (RSO) for this license, it is understood that these laboratories have had the following materials present at or below the maximum amount allowed by the license: **Phosphorus-32, Phosphorus-33, Sulfur-35, Iodine-125, Plutonium-239/Beryllium**. It is further understood that sub-license levels of both **Tritium** and **Carbon-14** have been present in these laboratories. EA respectfully requests any and all information that you may have on file for the Gettysburg College site.

Please contact me or Amy Jo Glenza at (410) 771-4950 in order to schedule an appointment when we may review available files or so that copies of available files may be sent to EA. I thank you for your time and appreciate your assistance in this matter.

Sincerely,

Frank Barranco  
Project Manager
