Subject: Additional Clarifications to the Yankee Nuclear Power Station Security Plan Relating to Security/Safeguards Measures for Dry Cask Storage

Yankee Atomic Electric Company (YAEC) is preparing to transfer spent fuel from the Yankee Nuclear Power Station (YNPS) Spent Fuel Pool to a dry cask storage facility beginning in the summer of 2001. In support of this activity, YAEC requested Nuclear Regulatory Commission (NRC) review and approval of an amendment to the YNPS Security Plan (References (c) and (d)). In response to our phone discussions of May 10, 2001 and May 21, 2001, YAEC hereby submits this revision to Attachment A of the proposed Security Plan. As requested, the Local Law Enforcement Agency (LLEA) response agreements, which are not included in the Plan, have been provided in the enclosure. Sections of the Security Plan impacted by these changes are marked with sidebars in the left margin.

This cover letter, when separated from the attachment and enclosure, is not Safeguards information. Please contact Mr. Jim Kay (978-568-2302) or Ms. Sandi Garvie (413-424-2241) if you have any questions, or need any additional information.
