MATERIALS ENGINEER  
 WESTINGHOUSE CORP  
 PITTSBURG PA

Gary,  
 I'm not sure which e-mail document you're referring to, so fax me a copy at (412) 374-6647. In regards to the Westinghouse metallurgical review of the TVA report, there is no documentation available that I have been able to find. In my interview with [redacted] I told him that the metallurgist whom I thought had reviewed the TVA report, had no recollection of ever knowing anything about the issue. I questioned other current metallurgical people in the department and no one had any knowledge or memory about the subject as well.

TC

Chuck Scrabis

> Chuck,

> I have a photocopy of an e-mail you sent to FORCHT, DULEMBA, IRONS, BOYLE AND YETTER. It appears to be the data which you provided for inclusion in the formal response to TVA per their request. I don't show a date on my copy.

> Can you supply a date? If you need to see a copy of the e-mail, provide me a fax # and I'll send it to you.

> Also, in your interview with the NRC Inspector General [redacted] on 2/23/98, you said that Westinghouse metallurgical staff had reviewed the TVA metallurgical report that Overall had faxed to you. Is there any documentation or any type report of that review?

TC
