Re followup interview of [redacted]  
We do not have a transcript or tape of a second interview of [redacted] My guess is that this followup interview was concerned with the alleged meeting [redacted] Other witness interviews could not substantiate [redacted] participation at that meeting and it basically became a non-issue. There was no reference in the Report of Investigation to the second interview which would have required a cross reference and inclusion of the document as an exhibit.

Re followup interview of James ADAIR:

I do not have any notes of the second interview of ADAIR. The primary purpose of the interview was to confront him with conflicting information in an attempt to have him acknowledge responsibility for his actions. The reference in the Report of Investigation to ADAIR's conflicting statements is based on his first interview (Exhibit 10) compared to statements made to the NRC:OIG (Exhibit 11). No information obtained in the second interview was used to substantiate the conclusions of the investigation.

In summary- OI has no documentation of the followup interviews of [redacted] or ADAIR. If there was documentation, OI would oppose release where the information was not used to prove or disprove the allegation.
