

Problem: TVA employees failed to disclose known information about potentially defective new ice condenser screws in the warehouse

Organization & Functions

7c

Jim Adair
Lead Civil Engineer
Watts Bar

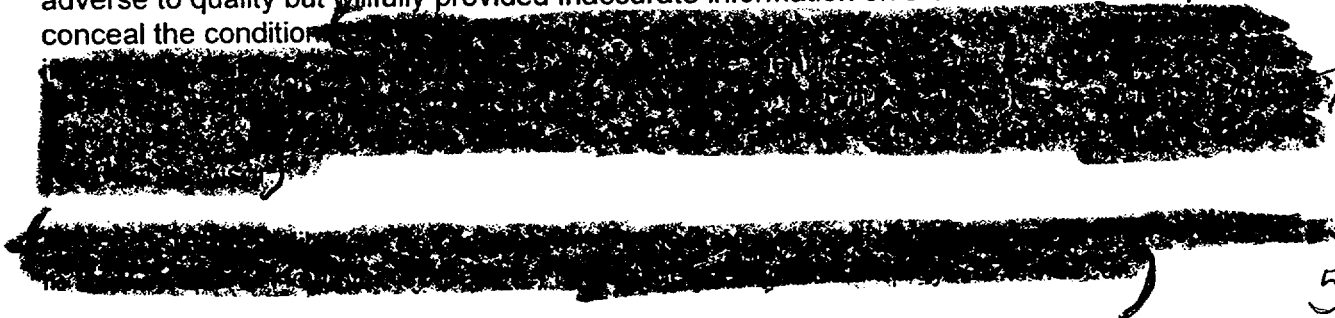

Larry Ketcham, Civil Engineer
Tom McCulloch, QA

Daryl Smith, Metallurgist

Landy McCormick, NSSS System Engineering Supervisor
Curtis Overall, Ice Condenser System Engineer

OI Conclusion: The lead civil engineer at Watts Bar Nuclear Plant became aware of a condition adverse to quality but willfully provided inaccurate information on a corrective action report to conceal the condition.
