Subject: WBN IC screws

Paul,

7C
Sammy Walker, Central Labs QA Mgr, testified that in 1997, CLS took the two lab reports (6/2/95 and 6/19/95) and did a side by side comparison. [REDACTED]

Walker further testified that it was only later (1998) that he came to learn that the information regarding the new, unused screws (set B) had been eliminated from the second report.

7C
The list I left with you includes the 17 differences [REDACTED] Please review the 17 items and advise from a technical perspective whether [REDACTED]

7C
The significance of this issue is whether or not [REDACTED] continued to ignore the information in the 6/2/95 report regarding manufacturing defects.

Thanks,
Gary
