Docket No. 50-271

Vermont Yankee Nuclear Power Corporation  
ATTN: Mr. Albert A. Cree  
President  
77 Grove Street  
Rutland, Vermont 05701

Change No. 4  
License No. DPR-28

Gentlemen:

The enclosed change to the Non-Radiological Technical Specifications (Appendix B) of Facility Operating License No. DPR-28 for the Vermont Yankee Nuclear Power Station (VYNPS) is being made to meet the comments of the Chairman of the Atomic Safety and Licensing Board found in the VYNPS Hearing Transcripts, October 26, 1972, pages 5973 through 5981. This change more clearly defines the responsibility of the Advisory Group, the method for communicating its recommendations to the AEC, and the means provided for advising the group of any AEC findings.

The Atomic Energy Commission representative is deleted as a member of this group to prevent a conflict of interest from arising due to the Commission's regulatory responsibility. An Atomic Energy Commission representative could attend a meeting on a requested basis. In addition, this change identifies that this group meets with a representative of the Vermont Yankee Nuclear Power Corporation.

In our evaluation of this change, we have concluded that it does not present significant hazards considerations not described or implicit in the Safety Analysis Report. There is reasonable assurance that the health and safety of the public will not be endangered by this change to the Technical Specifications.

Accordingly, the Non-Radiological Technical Specifications (Appendix B)

*Lee*
