Change No. 3

License No. DPR-28

SEP 7 1972

Docket No. 50-271

Vermont Yankee Nuclear Power Corp.
ATTN: Mr. Albert A. Cree
President
77 Grove Street
Rutland, Vermont 05701

Gentlemen:

The enclosed changes to the Technical Specifications (Appendix A) of Facility Operating License No. DPR-28 (previously limited to 1% of full power) for the Vermont Yankee Nuclear Power Station (VYNPS) are being made in conjunction with the issuance of a full power temporary operating license, pursuant to Section 50.57(d) of 10 CFR Part 50. These changes to Sections 3.3 and 4.3 of the Technical Specifications are being made to implement the conclusion stated in the staff's affidavit RS-7a, "Control Rod Drop Accident" filed with the Atomic Safety and Licensing Board in connection with the VYNPS temporary operating license hearing held on August 15, 1972.

The necessary requirements to monitor the station's impact on the environment when operating at full power are contained in a new Appendix B, the Non-Radiological Technical Specifications. The previous non-radiological Technical Specification requirements for operation of VYNPS at 1% power were contained in Section 7 of Appendix A, which are superseded by Appendix B and therefore, are now deleted.

Accordingly pursuant to Section 50.59 of 10 CFR Part 50, the Technical Specifications, Appendix A of Facility Operating License No. DPR-28 for the Vermont Yankee Nuclear Power Station are changed by removing the pages numbered 1, 69, 70, 71, 72, 75, 76, and 196 (all with various dates prior to 8/21/72), and by replacing them with the enclosed revised pages numbered 1, 69, 69a, 70, 70a, 71, 72, 75, and 76 dated 8/21/72 and by including the attached Non-Radiological Technical Specifications, Appendix B, dated 7/31/72.

Sincerely,

Roger S. Boyd, Assistant Director
for Boiling Water Reactors
Directorate of Licensing
