Docket No.: 50-338
License No.: NPF-4

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT 1
REQUESTED APPROVAL DATE FOR RELIEF REQUEST CS-3

In a May 30, 2001 letter (Serial Number 01-329), Virginia Electric and Power Company (Dominion) requested relief from specific ASME Code requirements for snubber testing. These relief requests were submitted based on a recent interpretation of ASME Code requirements for snubber testing. The relief requests were for snubber testing previously performed during the current intervals for both Units 1 and 2, and for snubber testing for the remainder of the third interval for Unit 1. To avoid any potential Code compliance issues with the Unit 1 snubber testing scheduled during the upcoming refueling outage, we request that Relief Request CS-3 for Unit 1 be approved by August 31, 2001.

If you have any questions or require additional information, please contact us.

Very truly yours,

L. N. Hartz
Vice President - Nuclear Engineering
