(66)

Dear Mr Lesar

I'm writing to say that I am opposed to licensing or construction of any MOX fuel factories. I am opposed to anything that will spread and continue to pollute our environment with nuclear toxins.

This MOX processing will only produce more waste and create more problems for which we will need more solutions

I worry too about the structure where this MOX would be processed

I have read that the structure is inadequate to protect against accidents.

Yours truly,

Louise C. Baker
