

February 27, 1996

Mr. Donald A. Reid  
Vice President, Operations  
Vermont Yankee Nuclear Power Corporation  
Ferry Road  
Brattleboro, VT 05301

SUBJECT: VERMONT YANKEE NUCLEAR POWER STATION - TAC NO. M82152

Dear Mr. Reid:

Enclosed is a copy of the Environmental Assessment and Finding of No Significant Impact related to your application for approval of disposal of slightly contaminated soil pursuant to 10 CFR 20.2002 dated November 18, 1991, as supplemented July 10, 1992. The proposed approval would allow disposal of slightly contaminated soil located beneath existing plant structures by leaving it in place.

The assessment is being forwarded to the Office of the Federal Register for publication.

Sincerely,

Original signed by:

Daniel H. Dorman, Project Manager  
Project Directorate I-1  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation

UNITED STATES NUCLEAR REGULATORY COMMISSION

VERMONT YANKEE NUCLEAR POWER CORPORATION

DOCKET NO. 50-271

VERMONT YANKEE NUCLEAR POWER STATION

ENVIRONMENTAL ASSESSMENT AND FINDING OF

NO SIGNIFICANT IMPACT

The U.S. Nuclear Regulatory Commission (the Commission) is considering approving disposal in place of slightly contaminated soil located beneath existing plant structures at the Vermont Yankee Nuclear Power Station (VYNPS), pursuant to 10 CFR 20.2002, as requested by the Vermont Yankee Nuclear Power Corporation (the licensee). VYNPS is located in Windham County, Vermont.

ENVIRONMENTAL ASSESSMENT

Identification of the Proposed Action:

The proposed action would approve disposal in place of slightly contaminated soil placed at its present location beneath existing plant structures during original plant construction.

The proposed action is in accordance with the licensee's application dated November 18, 1991, as supplemented by letter dated July 10, 1992.

The Need for the Proposed Action:

During plant operation, a leak from a chemistry sample sink drain released small amounts of radioactive contamination to soil located beneath existing plant structures. The licensee proposes to dispose of the contaminated soil in its present location.

Environmental Impacts of the Proposed Action:

The Commission has completed its evaluation of the proposed action and concludes that the proposed disposition of the soil in its current location will minimize the risk of unexpected exposure.

The change will not increase the probability or consequences of accidents, no changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does involve features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed action.

Alternatives to the Proposed Action:

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the proposed action. Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources:

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Vermont Yankee Nuclear Power Station.

Agencies and Persons Consulted:

In accordance with its stated policy, on December 21, 1995, the staff consulted with the Vermont State official, Mr. William K. Sherman of the Vermont Department of Public Service, regarding the environmental impact of the proposed action. The State official questioned the impact of the proposed action on decommissioning of VYNPS. At the time of decommissioning, the licensee will be required to demonstrate that the activity levels on the site are sufficiently low to permit releasing the site for general use.

FINDING OF NO SIGNIFICANT IMPACT

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated November 18, 1991, as supplemented by letter dated July 10, 1992, which are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Brooks Memorial Library, 224 Main Street, Brattleboro, VT 05301.

Dated at Rockville, Maryland, this 27th day of February 1996.

FOR THE NUCLEAR REGULATORY COMMISSION

Ledyard B. Marsh, Director  
Project Directorate I-1  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation
