Dear Mr. Uderitz:

SUBJECT: CORRECTION - CONFIRMATORY ORDER ON POST-TMI RELATED ISSUES -  
SALEM NUCLEAR GENERATING STATION, UNITS 1 AND 2

The Commission issued an Order on June 12, 1984 confirming your commitments to implement those post-TMI related items set forth in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability". This Order was based on commitments contained in your letters responding to the NRC's Generic Letter 82-33 dated December 17, 1982.

Your letter dated December 19, 1983 stated that the structural modifications to the Technical Support Center (TSC) would be completed by January 1984. However, as you point out, the TSC cannot be fully functional until the SPDS is installed and functional. In our Order of June 12, 1984 we have confirmed your schedule of December 1986 for the SPDS to be fully functional with operators trained. Therefore our Confirmatory Order incorrectly stated the status of the TSC as completed rather than the correct date of December 1986. We have attached the corrected page. Please substitute this page for the original in the Order.

A Correction Notice, which is being forwarded to the Office of the Federal Register for publication, is enclosed for your information.

Sincerely,

/s/S. Varga

Steven A. Varga, Chief  
Operating Reactors Branch #1

Dear Mr. Uderitz:

SUBJECT: CORRECTION - CONFIRMATORY ORDER ON POST-TMI RELATED ISSUES -  
SALEM NUCLEAR GENERATING STATION, UNITS 1 AND 2

The Commission issued an Order on June 12, 1984 confirming your commitments to implement those post-TMI related items set forth in Supplement 1 to NUREG-0737, "Requirements for Emergency Response Capability". This Order was based on commitments contained in your letters responding to the NRC's Generic Letter 82-33 dated December 17, 1982.

Your letter dated December 19, 1983 stated that the structural modifications to the Technical Support Center (TSC) would be completed by January 1984. We erroneously interpreted this to mean that the TSC would be functionally completed and this was indicated in our Order of June 12, 1984 in the "status" column of the Attachment to the Order. We have corrected page 2 to now indicate a date of December 1986 as the completion date since, as stated by you in your June 27, 1984 letter, the TSC cannot be considered fully functional until the SPDS is installed and becomes fully functional. We have attached the corrected page. Please substitute this page for the original in the Order.

A Correction Notice, which is being forwarded to the Office of the Federal Register for publication, is enclosed for your information.

Sincerely,

Steven A. Varga, Chief  
Operating Reactors Branch #1  
Division of Licensing

UNITED STATES NUCLEAR REGULATORY COMMISSION  
DOCKET NOS. 50-272 AND 50-311 DL  
PUBLIC SERVICE ELECTRIC AND GAS  
CORRECTION - ORDER CONFIRMING TMI COMMITMENTS

On June 22, 1984 (49 FR 25719), an Order issued by the U.S. Nuclear Regulatory Commission (NRC) was published in the Federal Register. This Order confirms commitments made by the Public Service Electric and Gas Company for Post-TMI related issues involving the Salem Nuclear Generating Station Units 1 and 2, which are located in Salem County, New Jersey.

The "Complete" status indicated for the Technical Support Center, appearing in Page 2 of the Attachment to the Order was incorrect and the correct date of December, 1986 has been substituted.

For additional details, see NRC's letter to the licensee dated July 26, 1984.

Dated at Bethesda, Maryland this 26th day of July 1984.
