MEMORANDUM TO: Stuart A. Richards, Director  
Project Directorate IV  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

FROM: Robert M. Pulsifer, Project Manager, Section 2  
Project Directorate I */RA/*  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MEETING WITH GENERAL ELECTRIC NUCLEAR  
ENERGY REGARDING CONSTANT PRESSURE POWER UPRATE

On June 13, 2001, members of the staff met with representatives of General Electric Nuclear Energy (GENE) to discuss Licensing Topical Report (LTR) NEDC-33004P, "Constant Pressure Power Uprate" that was submitted on March 19, 2001. A list of meeting attendees is provided in Attachment 1.

GENE requested this meeting with the staff because they wanted feedback on their approach to standardize licensees' applications for power uprate as addressed in the LTR. The staff responded with three general comments centered around these areas:

1. Selection of the issues for operational assessment.
2. More information is needed to be able to make a final determination (i.e., methodologies used, have they changed from previous reviews, and have inputs and assumptions changed?)
3. When approved codes are used, the staff needs to know that the limitations specified in the code approved safety evaluation are being addressed and what their results are.

GENE provided a brief discussion on CPPU. A copy of the slides provided by GENE for their presentation can be found in ADAMS under the accession number ML011650018.

The remainder of the meeting was closed to discuss specific issues from the LTR.

The staff stated that they will provide a response regarding the licensing approach GENE is requesting in the LTR.
