

October 10, 1989

Docket No. 50-271

Mr. L. A. Tremblay
Licensing Engineer
Vermont Yankee Nuclear Power Corporation
580 Main Street
Bolton, Massachusetts 01740-1398

Dear Mr. Tremblay:

SUBJECT: CORRECTION - AMENDMENT NO. 115 TO FACILITY OPERATING LICENSE -
NO. DPR-28 - VERMONT YANKEE NUCLEAR POWER STATION

By letter dated September 7, 1989 we issued Amendment No. 115 to Facility Operating License No. DPR-28 for the Vermont Yankee Nuclear Power Station.

In the Safety Evaluation, enclosed with the license amendment, on page 2, second paragraph, the next to last sentence states: "In a discussion with the licensee, they stated that these valves are listed with all the other containment isolation valves, in a separate Containment Leakrate Testing Program, and are being leakrate tested periodically." The last phrase, and are being leakrate tested periodically." should be deleted from the sentence, as it is not true, as the subject valves RHR-32, RHR-33 and 10-29 while removed from the Technical Specifications, will remain in the Program, but do not require leak rate testing as these valves are specifically exempted in the Program.

Sincerely,

Original signed by:

Morton B. Fairtile, Project Manager
Project Directorate I-3
Division of Reactor Projects I/II
Office of Nuclear Reactor Regulation
