Mr. Leon R. Eliason  
Chief Nuclear Officer & President-  
Nuclear Business Unit  
Public Service Electric and Gas  
Company  
Post Office Box 236  
Hancocks Bridge, NJ 08038

SUBJECT: CORRECTION TO AMENDMENT NO. 71

Dear Mr. Eliason:

By letter dated February 6, 1986, we issued Amendment No. 71 to Facility Operating License No. DPR-70 for Salem Nuclear Generating Station, Unit 1. The amendment authorized Salem Unit 1 to operate at a power level of 3411 MWt, but the appropriate license change was inadvertently omitted. By letter dated March 17, 1986, we noted this omission but did not include a corrected page. Therefore, we have enclosed a corrected license page that reflects the power level of 3411 MWt that was authorized by Amendment No. 71. Please insert this page into your license.

Sincerely,  
/s/  
Leonard N. Olshan, Project Manager  
Project Directorate I-2  
Division of Reactor Projects - I/II  
Office of Nuclear Reactor Regulation

(1) Maximum Power Level

Public Service Electric and Gas Company is authorized to operate the facility at a steady state reactor core power level not in excess of 3411 megawatts (one hundred percent of rated core power). Prior to attaining the one hundred percent power level, Public Service Electric and Gas Company shall complete the preoperational tests, startup tests and other items identified in Attachment 1 to this amended license in the sequence specified. Attachment 1 is an integral part of this amended license.

(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

(3) Deleted Per Amendment 22, 11-20-79

(4) Less than Four Loop Operation

Public Service Electric and Gas Company shall not operate the reactor at power levels above P-7 (as defined in Table 3.3-1 of Specification 3.3.1.1 of Appendix A to this license) with less than four (4) reactor coolant loops in operation until safety analyses for less than four loop operation have been submitted by the licensee and approval for less than four loop operation at power levels above P-7 has been granted by the Commission by Amendment of this license.

(5) PSE&G shall implement and maintain in effect all provisions of the approved fire protection program as described in the Updated Final Safety Analysis Report, and as approved in the NRC Safety Evaluation Report dated November 20, 1979, and in its supplements, subject to the following provision:

PSE&G may make changes to the approved fire protection program without prior approval of the Commission only if those changes would not adversely affect the ability to achieve and maintain safe shutdown in the event of a fire.
