Subject: Response to NRC Regulatory Issue Summary 2001-08, "Operating
Reactor Licensing Action Estimates," dated April 2, 2001

As a voluntary response to NRC Regulatory Issue Summary (RIS) 2001-08, "Operating Reactor Licensing Action Estimates," Detroit Edison is providing an estimate of the number of licensing actions that will be submitted for NRC review in Fiscal Year (FY) 2001 and FY 2002 as requested.

As defined in RIS 2001-08, licensing actions consist of requests for license amendments, license renewals or transfers, exemptions, relief from inspection and surveillance requirements, review of topical reports submitted on a plant-specific basis, or other licensee requests requiring NRC review and approval prior to implementation. Additionally, licensing actions identified as consolidated line item improvement process (CLIIP) are included in this estimate.

Attached to this letter is Detroit Edison's list of licensing actions that are anticipated to be submitted for NRC review during the remainder of FY 2001 and FY 2002.

There are no commitments being made in this letter.
