Mr. Donald C. Switzer  
President  
Northeast Nuclear Energy Company  
P. O. Box 270  
Hartford, Connecticut 06101

Dear Mr. Switzer:

Your letter dated October 17, 1975, requested authorization of a transfer by the Green Mountain Power Corporation of its 1.450% ownership interest to the New England Power Company in the matter of the Millstone Nuclear Power Station, Unit No. 3.

We have reviewed your request for approval of the above transfer of ownership and have concluded that the purchase of this additional interest by the New England Power Company does not affect our previous conclusion that the applicants are financially qualified to design and construct Millstone Nuclear Power Station, Unit No. 3.

Further, we have concluded that the activities authorized by this amendment can be conducted without endangering the health and safety of the public and that authorization of this amendment to the permit does not involve a significant hazards consideration inasmuch as it involves no significant increase in the probability of an accident, no significant increase in the consequences of an accident, nor does it involve a significant decrease in the safety margin. Therefore, we have concluded that the ownership transfer may be authorized as requested.

Enclosed is Amendment No. 3 to CPPR-113 for the Millstone Nuclear Power Station, Unit No. 3 which modifies the construction permit to reflect this change. Also enclosed is a copy of a related notice which has been forwarded to the Office of the Federal Register for publication.

Sincerely,

Original signed by  
D. E. Vassallo
