Docket No. 50-423

Mr. John F. Opeka
Executive Vice President, Nuclear
Connecticut Yankee Atomic Power Company
Northeast Nuclear Energy Company
Post Office Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

SUBJECT: MILLSTONE NUCLEAR POWER STATION UNIT 3 - CORRECTION TO AMENDMENT
NO. 84 (TAC NO. M84264)

On October 25, 1993, the Commission issued Amendment No. 84 to Facility
Operating License No. NPF-49 for Millstone Nuclear Power Station, Unit 3, in
response to your application dated July 31, 1992.

The amendment removed requirements from the License and Technical
Specifications pertaining to the Fire Protection Program, and placed these
same requirements in operating procedures.

The Safety Evaluation supporting Amendment No. 84 referenced "and the FSAR."
Enclosed is corrected page 3 of the Safety Evaluation deleting reference to
the FSAR.

Sincerely,

Original signed by:

the fire protection program and implementing procedures and for the submittal of recommended changes to the Company Nuclear Review and Audit group (Off-site or Corporate Review Group); and (6) fire protection program implementation shall be added to the list of elements for which written procedures shall be established, implemented, and maintained.

The licensee incorporated the Millstone 3 fire protection program into its FSAR in January 1986. The current TS operability and surveillance requirements for the detection systems, fire suppression systems, fire rated assemblies, and the fire brigade staffing requirements will be incorporated into the operating procedures. TS 6.5.2.6 (i) will be added to include the responsibility for review of the common site fire protection program and implementing procedures by the SORC. Therefore, the licensee has satisfied elements 1 through 3 of GL 88-12. The licensee proposed the standard fire protection license condition specified in GL 86-10 for Millstone 3. Therefore, the licensee has met element 4 of GL 88-12.

Elements 5 and 6 of GL 88-12 addressed changes to the administrative controls section of the TS. To satisfy these elements, the licensee proposed to add TS 6.5.1.6 (k) to include the review of the fire protection program and implementing procedures as an additional responsibility of the PORC and TS 6.5.2.6 (i) to include the responsibility for the review of the common site fire protection program and implementing procedures by the SORC. Element 6 of GL 88-12 also addressed adding fire protection program implementation to the list of elements for which written procedures shall be established, implemented, and maintained. TS 6.8.1 (g) already addresses the fire protection program, therefore, no changes are required. Therefore, the licensee has satisfied elements 5 and 6 GL 88-12.

The licensee's TS amendment request for Millstone 3 is in accordance with NRC guidance provided in GLs 86-10 and 88-12 and is, therefore, acceptable.

3.0 STATE CONSULTATION

In accordance with the Commission's regulations, the Connecticut State official was notified of the proposed issuance of the amendment. The State official had no comments.

4.0 ENVIRONMENTAL CONSIDERATION

The amendment changes a requirement with respect to installation or use of a facility component located within the restricted area as defined in 10 CFR Part 20. The amendment also relates to changes in recordkeeping or administrative procedures or requirements. The NRC staff has determined that the amendment involves no significant increase in the amounts, and no
