Subject: Charge for MARSSIM course...

Regarding the charge for attending the course that Ray Jisha and I attended last week (MARSSIM H-401/121), I believe the state of Texas was assessed tuition for our attendance. It is my belief that the state of Texas should not be assessed this cost.

The instructors for the course had materials prepared for approximately 25 students. 11 (9 NRC and 2 Agreement State) students participated in various portions of the course, with Mr. Jisha and I being two of only three students staying throughout the entire course. Other attendees would routinely exit the course for "meetings" and other undisclosed reasons. My point being, there was plenty of space available for more students.

In light of this, and in the interest of saving my state's limited travel and expense resources, I request that our attendance category be changed from "paying tuition" to "space available".

Thanking you in advance,

David Fogle

Subject: Tuition vs Space Available

There were two attendees from BRC at the MARSSIM course that was held May 8-10. BRC sent the names in as "paying tuition."

I got a note from one of the attendees who stated that there were only 11 people in the course (9 NRC and 2 Agreement State) although the instructors had enough course material for 25 students. In other words, it seems as if there was plenty of space available in this course.

In light of this, and since our resources for tuition are so limited, can the status for our two attendees be changed from "paying tuition" to "space available" so we do not have to pay for this particular course?
