U. S. Nuclear Regulatory Commission Public Meeting to Discuss Use of Risk Information in Regulating Nuclear Waste and Materials: Case Study on the Regulation of Uranium Recovery Facilities

Wednesday, June 13, 2001 7:00 p.m. to 9:00 p.m.

Executive Tower Hotel 1405 Curtis Street, Denver, Colorado

NRC's Office of Nuclear Materials Safety and Safeguards is examining the feasibility of using risk information in its regulation of waste and materials. As part of this effort, we have developed draft screening criteria for determining when risk information should be used in our regulatory activities. We are also developing safety goals which will help us more effectively carry out our safety mission.

The objectives of this meeting are (1) to discuss testing of draft screening criteria and development of safety goals through the case study on the regulation of uranium recovery facilities, and (2) to solicit recommendations and comments on how NRC should proceed with the case study, apply the draft screening criteria, develop safety goals, and incorporate risk information into its regulatory program.

AGENDA

<u>Time</u>	<u>Topic</u>	<u>Presenter</u>
7:00 - 7:05	Opening Remarks	L. Kokajko
7:05 - 7:10	Meeting Objectives and Format	P. Rathbun
7:10 - 7:20	Background Information	M. Bailey
7:20 - 7:50	Case Study on Uranium Recovery	R. Bari and E. Grove (BNL)
7:50 - 8:00	Break	
8:00 - 8:50	Comments and Recommendations	Meeting Attendees (facilitated by P. Rathbun)
8:50 - 9:00	Summary and Closing Remarks	L. Kokajko

All Attendees May Participate
