DOCKET 50-255 - LICENSE DPR-20 - PALISADES PLANT
Notification of Intent to Revise Palisades Site Emergency Plan

With regard to earlier NRC correspondence that identified a concern with Figure 5-2 of the Palisades Plant Emergency Plan, we have completed a review of the Palisades approach to designation of on-shift emergency staffing positions and determined that a change to Figure 5-2 is appropriate. The change will establish minimum on-shift staffing that will be consistent with the guidance provided in NUREG 0654, Table B-1. A plan to identify and implement supporting staffing changes is being developed, including target dates for action completion. Palisades will provide this plan for your information by August 1, 2001. Appropriate Palisades Plant Emergency Plan revisions will be completed in accordance with 10 CFR 50.54(q).

SUMMARY OF COMMITMENTS

This letter contains one new commitment:

Provide the plan to identify and implement Palisades Plant Emergency Plan staffing changes for NRC information by August 1, 2001.

Nathan L. Haskell
Director, Licensing and Performance Assessment

CC Administrator, Region III, USNRC
Project Manager, NRR, USNRC
NRC Resident Inspector – Palisades
