MEMORANDUM TO: Stuart A. Richards, Director
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: Michael L. Scott, Project Manager, Section 2
Project Directorate IV */RA/*
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF JUNE 25, 2001, MEETING WITH WESTINGHOUSE ON
WCAP-12472, "BEACON CORE MONITORING AND OPERATION
SUPPORT SYSTEM"

On June 25, 2001, the NRC staff met with Westinghouse to discuss Addendum Two to WCAP-12472-P-A, "Beacon Core Monitoring and Operation Support System." The attachment contains the list of meeting attendees. Copies of the nonproprietary slides used during the meeting are available under ADAMS accession number ML011790330.

The meeting started with a discussion of the various functions that Beacon will be monitoring and the information that will be available to the operator. Westinghouse discussed the methodology used to determine the functions that are monitored. Also discussed were the various detectors, Platinum (Pt) and Vanadium (V), which could interface with the Beacon core monitoring system and the various configurations and uncertainties associated with the detectors. There was a discussion that if a plant wants to use the Beacon as their primary plant monitoring system, a plant specific technical specification amendment would be needed. The meeting concluded with a discussion of questions which had been given to Westinghouse prior to the meeting. These questions were formally sent to Westinghouse by letter dated July 11, 2001 (ADAMS accession number ML011800113).
