

Litepro, LLC

ENCLOSURE

We are in the process of reviewing your application for the Model Teknolite flashlight. In order to continue our review on your application for registration certificate, we need the following information:

1. In Section 4.1, you indicated that the Model Teknolite flashlight has either two or four gaseous tritium light sources (GTLS). Based on one model name only, how can it be distinguished whether a unit has two or four GTLS?
2. In Section 4.2, the application stated that the lens cap displays the isotope name only. In accordance with 10 CFR 32.25(b), the lens cap should also identify the manufacturer, processor, producer, or initial transferor of the product. The manufacturer's logo is also acceptable.
3. In Section 5.2.1, the application provided the results of dose assessment only. In order to be a complete application, please provide the step by step calculations for all exposure pathway scenarios with a delineation of all the assumptions that were used in this assessment.
4. In Form A-1, the discoloration prototype testing conditions are different from the ambient conditions. For example, the temperature should be $27 \pm 10^{\circ}\text{C}$, not $23 \pm 10^{\circ}\text{C}$, and relative humidity is greater than or equal to 95%, not less than or equal to 80%. Please delineate these differences in the table.
5. In Form A-1, the prototype test was performed with humidity 68 % by Professional Radiation Consulting, Inc for discoloration. However, the ANSI/HPS 43.4-200 requires the minimum relative humidity of 95 to 100%. Please re-prototype test with minimum relative humidity of 95 to 100% or provide engineering analysis showing that the result would not be changed, or describe the results of the prototype tests, conducted in different atmospheric conditions, are applicable for the required atmospheric conditions.
6. In Sections 7.1 and 7.2, the application referred to Appendices C and D. However, these Appendices were not attached to the application. Please provide both Appendices.
7. Please provide a copy of the State of Florida possession license.

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION ON TEKNOLITE FLASHLIGHT

Dear Mr. Tchira:

This letter is in response to your application dated May 23, 2001, requesting registration certificate review for Teknolite flashlight. sights. We are in the process of evaluating your request. In order to continue our evaluation, we need additional information attached in the Enclosure.

Please submit the requested information within thirty days of the date of this letter. If we have not received complete information within thirty days of the date of this letter, we will consider your application as having been abandoned by you. This is without prejudice to the submission of a complete application.

This letter requests information regarding the registration of your product only. You will receive separate communication regarding your application for a distribution license.

If you have any questions, please contact me at (301) 415-5787 or Dr. John Jankovich at (301) 415-7904.

Sincerely,

/RA/
