

4/5/00 HCRS

Tom Kross

Instrumentations/backups/walkdowns

No Error Band on HRA analysis

If concentration place values low
Coordinate all HRA

ATHEMA for operators & mind set

Here with long time we are looking
at organizational mind set

Livermore 8 sites would exceed

CEUS 1 site KLN2 ^{max} 14 x 10⁻⁶
Next site 8 x 10⁻⁴
-14 x 10⁻⁶ EPP
2 x 10⁻⁶

Why is this not good enough

George

Kross - Not defining defendable

~~Geo. No uncertainty in analyses on seismic~~

Power & Plume spread

Kross - Effire may be worse than
Core

01/5/97

KERS Prompt fatalities vs latent fatalities
vs land contamination

9:50 - Risk Acceptance Criteria
9:55 length of time at risk

Wells criticality need to be
rounded off

Seismic criteria
Risk acceptance criteria - LERF criteria
T/H in fan
Bottom line on criticality
