Subject: Seismic writeup

George:

Both Glenn and Mike have indicated that the seismic writeup needs considerable editing to get it to be consistent with the rest of the risk sections, as well as Glenn indicating that responses to seismic public comments are not complete.

There may be other important work competing for Goutam's time. Are you following the completion status of this work to ensure that this appendix will be ready when needed?

Inquiring minds want to know?

Regards
Mark
