

July 20, 2001

LICENSEE: Rochester Gas and Electric Corporation

FACILITY: R.E. Ginna Nuclear Power Plant

SUBJECT: SUMMARY OF JULY 9, 2001, CONFERENCE CALL REGARDING THE
SCHEDULE TO REVIEW GINNA'S APPLICATION FOR INDIRECT TRANSFER
OF FACILITY OPERATING LICENSE

On July 9, 2001 the Office of Nuclear Reactor Regulation (NRR) participated in a conference call with the licensee, Rochester Gas and Electric Corporation (RG&E), to discuss a tentative schedule to review and evaluate the licensee's application for indirect transfer of facility operating license dated June 22, 2001. The list of participants is given in the enclosure.

The licensee requested that the Nuclear Regulatory Commission (NRC) review the application on a schedule that will permit NRC consent to the indirect license transfer early enough to support a closing date of September 30, 2001. Due to the numerous applications for license transfers, power uprates, and routine licensing actions already in process, the NRC cannot support the above closing date. As was previously stated by the NRC, our commitment to review and approve license transfers will take approximately six (6) months to complete. Therefore, the staff informed the licensee that the application for indirect transfer of facility operating license will be scheduled for completion in late December of 2001 or early January of 2002.

The Nuclear Safety and Licensing Manager for RG&E, Mr. George J. Wrobel, acknowledged our commitment schedule and, thereby, agreed with the proposed schedule.
