dave

that's emmitt murphy...  
Harold is out at STexas next week...i talked to him yesterday...  
thanks for taking the lead...

Wayne, I've set up a call with Emmitt Smith (Ted Sullivan is on vacation) for tomorrow (3/17) at 11:00 a.m. I'll have Mike Modes and will invite Larry, Harold Gray, Pete Eselgroth etc. to listen in. The purpose of the call will to get an update from Emmitt on IP2 effort and to identify what areas remain where Region I inspection may warranted. Stephanie Coffin will not be in til Monday, so I will touch base with her next week. She left IP2 today and will likely have the most up-to-date info. Mike has offered to go up IP2, if necessary. Dave

Dave,

I suggest that you have a debrief with the NRR folks. You should identify an inspector to follow current ISI activities at IP2. We have got to put our mark on these activities before restart.

>>> Lawrence Doerflein 03/15 2:13 PM >>>

NRR is at IP2 reviewing SG inspection data. I don't have the info, but Randy says NRR is not complimentary of ConEd's performance. Randy sugested, and I agree, we should have a regional inspector involved. I don't know what can be worked out, but we should talk about it.
