**Subject:** NRR call with Groth on S/G's, 4/5, 10 am

marsha gamberoni will summarize the results in an email. RI was not able to get onto the call.

One outcome of the call is that there will be a meeting between NRR and ConEd, in the site vicinity during the week of 4/17, to discuss various S/G tech issues. NRR/DLPM is arranging.

I recommend that the meeting should occur **AFTER** we've received the licensee written submittals on the SGTF root cause and their operational assessment, both of which are expected in that time-frame. Otherwise, we risk having a meeting that lacks technical substance, and we could be further drawn into a consulting-type interactions with the utility in a public forum. I think DRS and DRP should both attend the meeting.

There will be another subsequent meeting before R/S, of course; that meeting would be, I think, after all the licensee's conclusions are docketed, and after the staff is completed most of its tech review, but **before** our SER.

randy
