

**Pennsylvania DEP Bureau of Radiation Protection
Facility Survey Summary Sheet**

Facility/Site: Westinghouse Forest Hills

Date: 11/4/1999

Contact Person: Todd Brautigam

Phone #: (724)733-3000

Equipment – Ludlum 2221s with 44-10 NaI detectors; Bicon MicroAnalyst micro R meter.

Roy Woods and I performed a gamma survey of the hillside outside the facility fence where the outfalls are located. The background count rate ranged from 4,500 to 5,500 cpm. No count rates exceeding background were noted in this area. The background exposure rate ranged from 10 to 13 μ R/hr and no readings above background were noted in this area.
