Wayne

I appreciate your continued hard work...you too Dave...

Let's continue to work hard thru the exit...then go to "disneyland"...for a day! ( I do plan on being off friday....)

We need to back up our statements...

We need to be not argumentative...but go back to Hub's principles...and lay the foundation that they would then have to attack...

We have App B...we should rest in that...

But - let's get all our data...

1) do we have all Cass Dodd's (sp) info and assessment? if not , why not.

2) do we have our recommended enforcement items...? Has enf. (Holody, etc.) scrubbed?  
e.g., how do we wrap in a TS violation

We will need to summarize these probable violations at the exit...correct...

3) probe set-up...lets discuss...tomorrow

4) lets go over exit notes that Wayne had for last Friday's call again..

5) Who will call in on exit?....licensee has a bridge??

see ya in the morn...

B
