Subject: IP2 Stuff

Hi Wayne;

Here are the pieces of IP2's 1997 Appendix H Qualification that I'm looking for:

- 1) Summary (cover letter) that reflects IP2's use of Appendix H Qualified Techniques for the 1997 S/G Examination.
- 2) Pages that reflect the Rotating and CECCO Probe Coils qualification.
- 3) Table that reflects probe qualification for PWSCC, Axial cracks in Short Radius U-Bend Region.
- 4) Table of "Probe Qualification by Damage Mechanism."
- 5) Figures for Lab Samples to support EPRI quals for PWSCC, Small Radius U-Bend - Industry and Site Specific.

If you would just put yellow stickers on the appropriate pages and ask Cheryl Miskey to fax those pages to me. I've asked Cheryl and she's agreed to fax the information to me.

Thanks for the help.

Jimi
