Subject: IP2 SG Inspection

Hello all from IP2 - I just got done talking with J. McCann - it sounds like they are a little nervous about the 6/14 proposed meeting, if they don't hear from NRR on the CMOA today. I think they also want to talk about the answers to the RAI questions.

What are the plans for Ian next week and after. The ConEd IQDA will be onsite next week through Thursday and will be coming to the 6/14 meeting. The plan would be for Ian to get up to speed on Monday and for us to have a call with IP2 as needed on Tuesday from the Region to discuss the inspection needs. I will talk with ConEd on Wed after the meeting, and we will talk again on Friday in Prep for the following week.

The team will need to know what NRR wants us to look at ASAP - hopefully by the end of next week.

As we had talked before, the team will need any writeups done as part of the time spent on site following the event (Caius, Stephanie, Laura). I would like to get them or at least talk about the observations, by the end of next week.
