Subject: Re: EPRI SG Guideline

Michael,

I delivered a copy of the EPRI report "PWR Steam Generator Examination Guidelines: Revision 5" to the chief of the Mail Room for the overnight delivery to you at 12:30pm.

I think FEDEX usually picks up the package around 3 or 4 pm.

The report was published in 9/97.

John

I am trying to help the RI IP2 SG Inspection Team figure out what IP2 should have done in '97 so we can figure out what they may not have done.

In order to do that I am going to need the EPRI SG Guidelines that were in affect at that time.

According to Ted your the guy with the information.

Can you send me a copy of the appropriate Guideline? Really soon? FAX? (610 337 5320)

Thanks,

M*
