Subject: Re: IR and Questions

Hi Ted - any time you want to talk on the IR I'm ready. I need to get the comments in today, so I can get Jim Wiggins a copy tonight. Brian H will be at the ACRS meeting tomorrow and I will be making final changes and edits. We plan on signing the report on Thursday morning.

If you could work on writing an answer to the TS question it would be extremely helpful. The context is if a knowledgeable reader goes through the reprot, they may see that Con Ed and ther NRC say that there were defects left in-service in 1997, that would appear absent the sizing problems, wchich will be forgotten, to be greater than the 40% -TW plugging limit. We want a short cogent answer as to why we think that citing the TS is not appropriate.
