## **NRC TO MEET WITH DETROIT EDISON COMPANY TO DISCUSS SAFETY PERFORMANCE AT THE FERMI 2 NUCLEAR POWER STATION**

The Nuclear Regulatory Commission will meet with Detroit Edison Company officials June 21 to discuss the NRC's annual assessment of safety performance at its Fermi 2 Nuclear Power Station in Newport, Michigan.

The meeting will begin at 6 p.m. EDT and will be held at the Monroe City Council Chambers in Monroe City Hall, 120 East First Street in Monroe. The public is invited to observe the meeting. NRC officials will be available after the meeting to answer questions.

The annual assessment, referred to as the End-of-Cycle assessment, evaluates safety performance at Fermi 2 from April 2000 through March 2001, and informs plant officials of the NRC's plans for future inspections at the facility.

The Fermi 2 assessment letter and inspection plan are available at <http://www.nrc.gov/OPA/ppr> or from the Region III Public Affairs Office. Current performance information for the plant is available at <http://www.nrc.gov/NRR/OVERSIGHT/ASSESS/index.html>.
