UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555

March 8, 1989

OFFICE OF THE
SECRETARY

MEMORANDUM FOR: Chairman Zech
Commissioner Roberts
Commissioner Carr
Commissioner Rogers
Commissioner Curtiss

FROM: Samuel J. Chilk, Secretary

SUBJECT: LSS ADVISORY MEMBER RESPONSES TO
QUESTIONS FROM COMMISSIONER CURTISS

On February 24, 1989, this office forwarded to Mr. Bellman, with copies to the members of the HLW Licensing Support System Advisory Committee, a list of questions prepared by Commissioner Curtiss about the final rule proposed in SECY-89-27 - Final Rulemaking on the Licensing Support System for the High-Level Waste Licensing Proceeding. Because of the Commission's desire to act expeditiously on the final rule (Chairman Zech and Commissioners Carr and Rogers have already voted to issue the rule), we asked that each participant provide their input directly to SECY as well as to Mr. Bellman.

Responses from four Committee participants have now been received and are enclosed. The responses of industry and the coalition of Nevada local governments, will be forwarded when received. We are also expecting Mr. Bellman's composite reply for the Committee within a day or two.

RECEIVED
1989 MAR - 8 PM 3:58

rule itself, the Supplementary Information, and its written and oral comments and responses to the Commission.

You have attached to your memo "strawman answers" prepared by the NRC staff to each of Commissioner Curtiss's questions. You note that the staff believes that these answers accurately characterize the results of the Committee deliberations during the rulemaking process, and indicate that if a participant disagrees with any of those answers, we should so indicate. We have reviewed those so called "strawman answers" and, while we do not wish to specifically approve of and thus associate ourselves with them, we can find nothing in them with which Nevada strongly disagrees.

While we wish that we could find ourselves able to be more precise in our response to your memo, we trust that you, and Commissioner Curtiss, will understand our reasons for not doing so.

With best personal regards.

Yours very truly,

MURPHY & DAVENPORT

RE: Curtiss' Questions to the LSS Negotiating Committee

Dear Secretary Chilk,

On February 27, 1988, I received a packet of information requested responses to a series of questions on the LSS rule posed by Commissioner Curtiss. On Commissioner Curtiss' behalf, you have solicited an individual response from the Environmental Coalition of the Negotiating Committee. I was the spokesperson for this coalition. Our response to your questions is as follows.

The answers are contained in the language of the rule itself, and/or in the supplemental information which accompanies the rule. (It is my understanding that NRC staff has made available to Commissioner Curtiss a list of citations to the proposed final rule, the supplemental information and other Commission laws and regulations where answers to the questions posed may be found.) Precisely because Committee members were concerned that the underlying rationale for the rule and certain implementation issues might not be clear from the text of the rule itself, the Committee included the text of the supplemental information as part of the subject for negotiations.

The Environmental Coalition believes that any additional information we provide may unnecessarily jeopardize the consensus reached, which was a consensus based on the rule as a whole. Alternatively, the Commission could reconvene the Committee to negotiate a consensus response to Commissioner Curtiss' questions beyond the answers contained in the supplemental information, perhaps using as a starting point the strawman responses prepared by the NRC staff which the Environmental Coalition has reviewed and found to reflect, for the most part, the consensus as reported in the rule and supplemental information. Absent such further action, we cannot submit a more detailed response than this.

Sincerely,

Melinda Kassen
Senior Attorney

Mr. Samuel J. Chilk, Secretary
Office of the Secretary
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Chilk:

This is in reference to your memorandum of February 24, 1989, to Howard S. Bellman of the Conservation Foundation in which you ask that each participant on the HLW Licensing Support System Advisory Committee provide its views as to whether the NRC staff "strawman" enclosed in your February 24 memorandum, in responding to questions of Commissioner Curtiss (also enclosed in that memorandum), in fact accurately characterize the outcome of the Committee's deliberations. We believe the outcome of the Committee's deliberations are expressed in the proposed rule and its supplementary information which reflected the draft text agreed to by the negotiating committee with the exception of the industry coalition. We also believe that the NRC staff "strawman" represents an accurate elucidation of this agreement.

Sincerely,

A handwritten signature in dark ink, appearing to read "Jerome D. Saltzman".

RE: Commissioner Curtiss's Questions on the LSS Rule

Dear Mr. Chilk:

I am in receipt of your February 24, 1989 Memorandum for Howard S. Bellman, with enclosed Memorandum to you and questions from Commissioner Curtiss for the LSS Negotiating Committee members. I represented the National Congress of American Indians on the Negotiating Committee, and am authorized to provide the following response on NCAI's behalf.

We appreciate Commissioner Curtiss' active interest in the LSS rule, particularly in light of his appointment to the Commission late in this rulemaking process. Regretfully, and with all due respect, we believe that the protocols and the spirit of the negotiated rulemaking process preclude us from providing specific responses to his questions.

Commissioner Curtiss has asked for "the views of the Committee as a whole, where consensus exists, and views of individual members where there is no consensus." Unfortunately, we are unable to characterize the views of the Committee as a whole beyond pointing to the result of the Committee's labors: all of the participants except the industry coalition agreed to the text of the rule and the supplementary information which is presently before the Commission. We cannot embellish that product without re-convening the Committee.

For the same reason, we must respectfully decline to propound our views as an individual Committee member. Among the protocols of the Negotiating Committee was an agreement by the parties not to comment on any consensus position which we had concurred with. If we were to provide our specific views on Commissioner Curtiss's questions, those views might conflict with those of another concurring party, thus threatening the consensus that was achieved. (We believe it is apparent from the

Re: Request For LSS Advisory Committee Responses To
Questions From Commissioner Curtiss

Dear Secretary Chilk:

This is in response to your memo to Howard Bellman of February 24, 1989, a copy of which you provided to each member of the LSS Negotiating Committee, attaching a series of questions posed by Commissioner Curtiss regarding the LSS Rule. This response is provided on behalf of the State of Nevada.

As you point out in your memo, Commissioner Curtiss is seeking clarification from members of the Negotiating Committee on selected parts of the rulemaking package. Nevada declines to provide further amplification of our position, beyond what we have already said in our written and oral comments to the Commission, and in responses to questions from members of the Commission at the February 7, 1989 meeting.

In declining to respond specifically to Commissioner Curtiss's questions we wish to note the following. First, Nevada agreed to support the proposed rule because it represented a compromise among those parties who joined the consensus. Secondly, because the text of the rule itself, and its rationale, represented a consensus, the Supplementary Information explaining that text and rationale itself became a negotiated statement, representing a consensus among those members of the Committee who joined the overall consensus. To provide Nevada's specific response to Commissioner Curtiss's questions at this time, and thus an individual view as to the operative meaning of the rule, potentially threatens to break open the consensus arrived at, a circumstance which we would find highly undesirable, and which we therefore do not wish to risk. For these reasons Nevada stands on the language of the

testimony of the parties at the Commission's February 7, 1989 briefing that the near-consensus that was achieved is highly valued by all the concurring parties.)

We have examined the "strawman" answers that were prepared by the NRC Staff. While they appear as a whole to be reasonable explanations of the outcome of the negotiations, we cannot endorse them as such, as they have not been discussed by the Committee. We would not consider it appropriate for those strawman answers to become a *de facto* part of the rulemaking history without having them be the subject of negotiation by the Committee.

NCAI values highly its good working relationship with the NRC Staff and with the Commissioners. The Commission has evidenced much-appreciated receptivity to the concerns and interests of Indian tribes in recent years, particularly in the context of the nuclear waste program. We underscore that favorable experience in order to emphasize that we do not lightly or cavalierly decline to provide the specific responses which Commissioner Curtiss requests. We sincerely hope to have and to maintain a productive relationship with Commissioner Curtiss as with the Commission as a whole. We trust that he will understand that our difficulty with his questions is process-related, and in no way reflects any disrespect or disregard for either Commissioner Curtiss or the substance of his concerns.

Sincerely yours,

Dean R. Tousley
