Docket Nos. 50-280, 281  
50-338, 339  
License Nos. DPR-32, 37  
NPF-4, 7

Gentlemen:

**VIRGINIA ELECTRIC AND POWER COMPANY**  
**SURRY AND NORTH ANNA POWER STATIONS UNITS 1 AND 2**  
**10 CFR 50.59 FINAL RULE IMPLEMENTATION**  
**TECHNICAL SPECIFICATION CONFORMING CHANGES**

In implementing the revised 10 CFR 50.59, Final Rule, Federal Register notice (64FR53582) Virginia Electric and Power Company (Dominion) intends to address associated Technical Specification (TS) changes required by the issuance of the final rule by submittal of Improved Technical Specifications (ITS). As stated in the final rule, "...the NRC requests that upon such occasion as those sections of the TS require NRC approval for other reasons, or a licensee is requesting a license amendment in some other area of the TS, the licensee should include any necessary changes to the existing TS language to bring the plant-specific technical specifications into conformance with the rule language." Conversion to ITS for both plants will address the necessary changes to conform to the rule language.

Dominion submitted North Anna Power Station proposed ITS to the NRC on December 11, 2000, per letter Serial Number 00-606. The current schedule date for submittal of Surry Power Station ITS is October 2001. Therefore, a separate amendment request to the current version of the Technical Specifications will not be submitted for either North Anna or Surry to address conforming changes for the 10 CFR 50.59 Final Rule implementation.

Please contact us if you have any questions or require additional information.

Very truly yours,

David A. Christian  
Senior Vice President and Chief Nuclear Officer

IE47

Commitments made in this letter: None.
