Perry Nuclear Power Plant
Docket No. 50-440
Informational Update Regarding Amendment 114 (TAC No. MA9093)
Emergency Service Water Sluice Gate Seals

Ladies and Gentlemen:

This letter provides an informational update regarding the status of the implementation of Amendment 114 to Facility Operating License No. NPF-58 for the Perry Nuclear Power Plant (PNPP). The PNPP staff requested this amendment by letters dated June 1, 2000 (PY-CEI/NRR-2492L) and June 30, 2000 (PY-CEI/NRR-2505L). The approved amendment installed an Emergency Service Water sluice gate seal commensurate with 10 CFR 50, Appendix B requirements. The sluice gate seal has been installed and satisfactorily tested and is available as planned to support plant operation. In accordance with established regulatory commitments, the elastomeric seal and associated inflation system has been upgraded to safety grade in accordance with 10 CFR 50, Appendix B requirements.

This letter is for the Nuclear Regulatory Commission's information and does not introduce any new regulatory commitments. If you have questions or require additional information, please contact Mr. Gregory A. Dunn, Manager - Regulatory Affairs, at (440) 280-5305.

Very truly yours,

cc: NRC Project Manager
