Subject: Westinghouse info on 1997 IP-2 SG Inspections

I faxed the info Wayne gave me down to Greg Cwalina at NRR today. I told him that I would let him know if we get any more info (someone gave me the impression today that there may be more stuff). I reminded him that the ball will be in their court once we have what we are going to have, i.e., that they have to make a case that wrongdoing may have occurred, and that they would have to describe the violation that was violated at the next ARB.
