Subject: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
License No. DPR-64
**Withdrawal of Relief Request for Third Ten Year Inservice
Inspection Interval Program Plan and Proposed
Technical Specification Change to Fuel Storage
Building Emergency Ventilation System Testing Frequency**

Reference: 1. Indian Point 3 letter IPN-00-055 to NRC, "Third Ten Year Inservice
Inspection Interval Program Plan," dated July 18, 2000.
2. Indian Point 3 letter IPN-00-064 to NRC, "Proposed Technical
Specification Amendment to Extend the Surveillance Frequency for the
Fuel Storage Building Emergency Ventilation System," dated September 7,
2000.

Dear Sir:

The purpose of this letter is to withdraw two requests currently under NRC review. Reference 1 transmitted Relief Requests 15 and 17. This letter withdraws those relief requests pursuant to a June 28, 2001 conversation with the NRC staff. During that conversation it was understood that this withdrawal is administrative in nature and Entergy intends to resubmit the relief requests once additional information desired by the NRC staff has been prepared. Reference 2 requested an extended surveillance interval for the Fuel Storage Building Emergency Ventilation System. This Technical Specification change request is being withdrawn at this time pending development of historical testing information.

There are no new commitments made by this letter. If you have any questions, please contact Mr. John Donnelly.

Very truly yours,

Robert J. Barrett
Vice President - Operations
Indian Point 3 Nuclear Power Plant
