Docket Nos.	50-338 50-339
License Nos.	NPF-4 NPF-7

Gentlemen:

**VIRGINIA ELECTRIC AND POWER COMPANY**  
**NORTH ANNA POWER STATION UNITS 1 AND 2**  
**REQUEST FOR ADDITIONAL INFORMATION FOR**  
**HALON FIRE SUPPRESSION SYSTEM (TAC NO. MB1861)**

In a December 1, 2000 letter (Serial No. 00-391B), Virginia Electric and Power Company (Dominion) provided information regarding the design and operation of the manually actuated Halon fire suppression system. In addition, a cost estimate was provided to convert the manually actuated system to automatic actuation for North Anna Units 1 and 2. Since that time, there have been several telephone conference calls and a site visit by the NRC to further evaluate the operation of the manual Halon fire suppression system.

In a July 18, 2001 letter, the NRC requested additional information to support closure of NRC review on this issue. The letter requested a response within sixty days. However, at the NRC's request a telephone conference call was held on July 24, 2001 to provide the requested information. Based on the information provided in the telephone conference call, both the NRC and Dominion agreed that no additional correspondence is necessary or will be submitted with respect to the July 18, 2001 letter.

If you have any further questions or require additional information, please contact us.

Very truly yours,

Stephen P. Sarver  
Director - Nuclear Licensing and Operations Support

Commitments made in this letter: None
